

Transforming fragmented site data into real-time actionable intelligence

Problem Statement

- Manual Inefficiency
- Data Fragmentation
- Compliance Risks
- Operational Latency

Target Users

- Operations Leaders
- Finance Managers
- Site Supervisors
- IT/Security Heads

Key Business Benefits

- Massive Efficiency Gains
- Exceptional Data Accuracy
- Unprecedented Visibility
- Enhanced Accountability
- Secure Scalability

ZYSITE

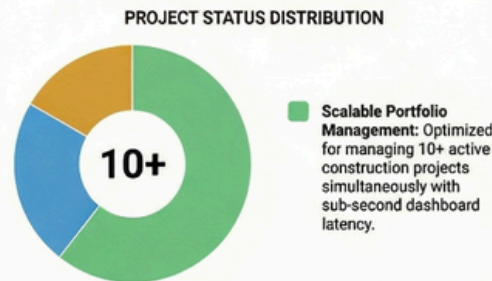

Construction Site Management Platform

ZySite is a comprehensive AI-powered platform designed to streamline construction operations by automating document workflows and providing real-time operational insights. By integrating smart docket processing, digital site diaries, and timesheet management, ZySite eliminates manual data entry bottlenecks and ensures seamless synchronization between the field and enterprise resource planning (ERP) systems.

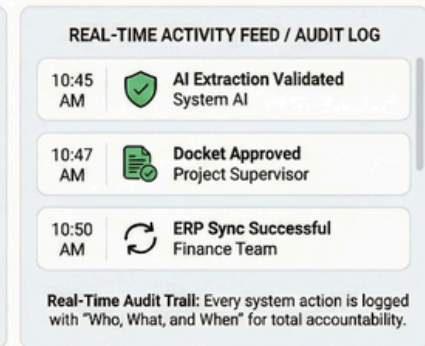

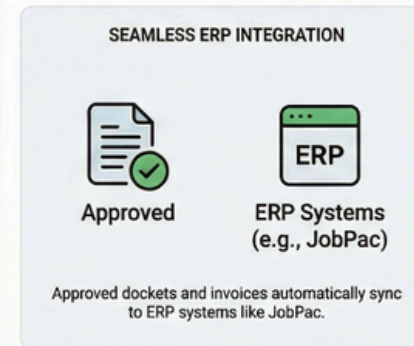

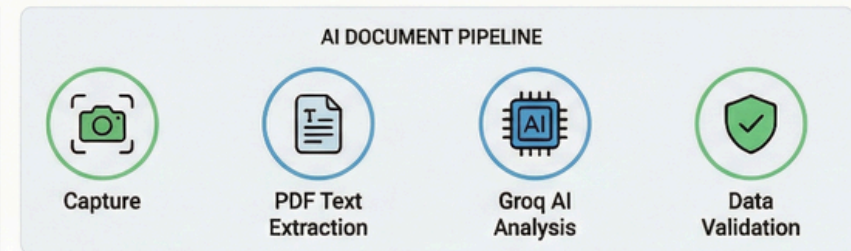

ZySite Enterprise Operations: AI-Powered Construction Management Dashboard

Visualizing high-level project health, document processing efficiency, and the real-time AI extraction pipeline.

Project & Document Vital Signs

The AI Extraction Pipeline & Activity Feed

FEATURES & WORKFLOW

Core Features

- AI Smart Docketing
- Digital Site Diaries
- Integrated Timesheets
- Multi-Level Approvals
- Multi-Admin Control
- ERP Sync

Use Cases / Scenarios

- Material Delivery
- Daily Progress Reporting
- Labor Tracking

Security / Compliance

- Advanced Authentication
- Role-Based Access Control (RBAC)
- Audit Accountability
- Self-Protection Logic
- Enterprise Tech Stack

How It Works

- **Step 1:** Capture: Field teams upload dockets, diaries, or timesheets via a mobile or web interface.
- **Step 2:** Extract: AI (Groq LLM) automatically processes the files, extracting structured data and assigning confidence scores.
- **Step 3:** Approve: Designated Supervisors or Finance personnel review the extracted data through a streamlined approval dashboard.
- **Step 4:** Sync: Validated data is automatically pushed to the enterprise ERP system, updating financial and project records instantly.

Zysite: From Field to Finance—The AI-Powered Document Lifecycle

Zysite is an AI-powered construction management platform that automates the lifecycle of site documents like dockets and invoices. By replacing manual entry with 99% accurate AI extraction, it connects field operations directly to office ERP systems.
